# HASINTHA DILSHAN

Associate Software Engineer at CodeGen International, eager to apply and expand knowledge in software development, AI, Agentic AI and IoT projects.

Tel : +94 70 555 9052
Email : jmhdilsha@gmail.com
Address : Malabe , Colombo

Git : github/H4S1NTH4
LinkedIn : linkedin/Hasintha_Dilshan

## EDUCATION

**BSc (Hons) in IT Specialising in Software Engineering**
Year 4 Semester 2 | Sri Lanka Institute Of Information Technology
Cumulative GPA : **3.59**

**G.C.E Advanced Level – 2021 -** B/Badulla Central Collage
Stream : Physical Science | Grade : Physics - C , Chemistry - C , Combined Mathematics - S , English - A

## ACHIEVEMENTS

Dean's List Awards 2022 (Y1S1) - 3.86 GPA
Dean's List Awards 2023 (Y1S2) - 3.80 GPA
Dean's List Awards 2024 (Y2S2) - 3.84 GPA

Half Semester fee Scholarship Award 2022 (Y1S1)
Half Semester fee Scholarship Award 2023 (Y1S2)
Half Semester fee Scholarship Award 2024 (Y2S2)

## SKILLS

- Java
- Python
- SQL
- Java Script
- Express
- Node
- SpringBoot
- Angular
- C / C++
- React
- Arduino
- Agentic AI
- Docker
- Kubernetes

## SOFT SKILLS

- Communication
- Problem Solving
- Management
- People Handling
- Leadership
- Adaptability
- Solution Engineering
- Decision Making

## EXPERIENCE

**Entgra - Associate Software Engineer ( since February 2026 - Present )**

- Working on Java based server backend to IoT device communication protocol implmentation.
- Working on WSO2 services based programming stack featuring electrical meter communictaion and billing automation.

**Codegen International - Associate Software Engineer ( since July 2025 - February 2026 - 8 months )**

- Working in Research and Development department. Contributing to multiple client delivery and research projects.
- Mainly working on Java, Python, Java Script, ReactJs
- AI-powered ERP application and AI agentic solutions, including client communication and sales management.
- Software–Hardware integration for enhanced system functionality and performance.

**Codegen International - Internship ( since January 2025 - July 2025 - 6 months )**

- Actively engaged in the complete project lifecycle of an AI-powered Smart KIOSK for One World Duty-Free, from initial research to client deployment.
- Contributed to the development and integration of both software and hardware components, gaining experience in full-stack development.
- Participating in live client meetings, effectively communicating technical updates, and aligning solutions with client requirements.

**Sri Lanka Badminton - Badminton Umpire ( since December 2023 - Present )**

- Working as a probation level umpire at Sri Lanka Badminton

**Badminton Coach ( since 2019 - Present )**

- Sri Lanka Badminton Level 1 Certified Coach

## PROJECT EXPERIENCE

**AI Agentic Development**
Langraph | Python | LLM Orchestration
Working on: AI agentic applications primarily for flight booking and hotel reservations utilizing LIA (CodeGen's core AI agentic platform. )

**Automated Hydroponic Fodder System and Freezer Room Monitoring System- IoT**
Technologies: C++ | IoT | Arduino | Embedded System programming
Intergrated IoT driven system for automate watering in hydroponic fodder and controll the greenhouse enviroment. Real time sensor data are displaying and emergency handling through the web application.
Implemented Warehouse monitoring system specially for remotely monitor realtime freezer room temperature and motions using sensors. Implemented automated emergency backup for freezer rooms using IoT driven sensors.
Linkedin : https://lnkd.in/gy8NBb68

**Dairy Farm management System - Nevil Nutri Farms**
Technologies**:** MongoDb | Express.js | React | Node | IoT | C++ | Arduino
Working on : Production management subsystem.
Features : Automated process starting and real time process monitoring, Inventory management, Smart storage room monitoring.
GitHub : https://github.com//Dairy-farm-management-system.git

**Food Delivery App - Microservices project with Spring Cloud and Kubernetes**
Technologies: SpringBoot | Java | Next | Kubernetes | Docker | CI/CD
Food delivery application under the distributed system module, utilizing OpenFeign for inter-service communication. Spring Cloud discovery and used Kubernetes with minikube for local deployment with Devops and CI/CD practices.
GitHub : github.com/floo-server

**SLIIT IEEE Computer Socielty Website**
React | Java | Firebase
Contributing to the development of SLIIT IEEE CS website as a member of IEEE web development team.
GitHub : github.com/IEEE_WEB.git

**Online Baby Care Shop**
Java | Servlets | JavaScript | HTML | CSS
Features : Crud Applications and administrative permissions management.
GitHub : https://github.com/Admin-Dashboard.git

**Ongoing Research**
Golang | Java | Python | Agentic AI | Deep Learning | Kubernetes |
Features : A component containing a student grading system with an integrated IDE that monitors and analyzes user behavior in real time. Continuous user authorization using keystroke dynamics and reinforcement learning. Analyzes user cognitive level by tracking coding behavior throughout sessions.

## EXTRACURRICULAR ACTIVITIES

**Badminton Player -** CodeGen Badminton Team
**IEEE Web Development Team member** (2023-2024) - SLIIT
**Prefect** - Badulla Central College / Dharmadutha College
